

JUST THE **FACTS**

MIDAMERICAN ENERGY COMPANY

SERVICE AREA	10,600 square miles
ELECTRIC CUSTOMERS SERVED	752,000
NATURAL GAS CUSTOMERS SERVED	733,000
OWNED AND CONTRACTED GENERATION CAPACITY	8,535 megawatts
OWNED AND CONTRACTED RENEWABLE AND NONCARBON GENERATION CAPACITY	4,009 megawatts

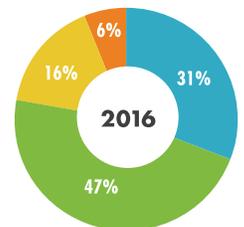

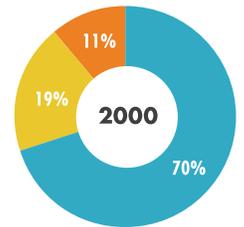

BILL J. FEHRMAN
President and CEO

MidAmerican Energy Company, based in Des Moines, Iowa, meets customers' energy needs by providing reliable, affordable and environmentally responsible energy to customers in Iowa, Illinois, South Dakota and Nebraska.

RENEWABLE ENERGY LEADER

- MidAmerican Energy began investing in renewable energy in 2004.
- In April 2016, we announced our 100% renewable vision; we want to provide 100% renewable energy for our customers. The Iowa Utilities Board approved our 2,000-megawatt Wind XI project in August 2016, bringing us one step closer to our goal. When the Wind XI project is complete, our annual renewable energy generation is expected to reach a level that's equal to 85% of our Iowa customers' annual retail usage.
- By the end of 2016, the energy MidAmerican Energy generates from wind will equal 47% of all energy sold to its retail customers in Iowa.
- MidAmerican Energy is the No. 1 owner of wind-powered generation among U.S. rate-regulated energy providers. With the completion of Wind XI, our investment in wind projects will be more than \$10 billion, with minimal cost impact to our customers. Our rates in Iowa are among the lowest in the nation and approximately 38% below the national average.

OUR CHANGING CAPACITY MIX

- WIND
- COAL
- NATURAL GAS
- NUCLEAR/OTHER

CUSTOMER COMMITMENT AND SATISFACTION

- Our customers deserve the best, and we're committed to providing exceptional service. We solicit feedback from customers to ensure we not only meet, but exceed, their expectations and we consistently rank among the nation's leading energy providers in national surveys measuring overall customer satisfaction.

DEMONSTRATING ENVIRONMENTAL RESPECT

- MidAmerican Energy believes responsible environmental management is good business. We are committed to using resources wisely and preserving, protecting, restoring and improving our natural surroundings for the benefit of future generations.
- In 2015, MidAmerican Energy completed a 10-year initiative to install environmental improvements at its coal-fueled generation plants, which aligned with existing and anticipated requirements of the U.S. Environmental Protection Agency. This included the installation of emissions controls on all large coal-fueled generation units that will operate beyond 2016.
- MidAmerican Energy reduced its coal-fueled generation capacity in 2015 by removing two units at Walter Scott, Jr. Energy Center from service and limiting Riverside Generating Station's fuel source to natural gas. In April 2016, two coal-fueled units at Neal Energy Center were retired.
- In partnership with the Iowa Department of Natural Resources and the U.S. Fish and Wildlife Service, we are developing a habitat conservation plan for our Iowa wind projects.
- Our company was recognized as one of 36 Environmental Champions in the 2015 Cogent Reports Residential Utility Trusted Brand and Customer Engagement Study. And for the 15th year in a row, MidAmerican Energy was honored by the National Arbor Day Foundation and the National Association of State Foresters with the Tree Line USA designation, recognizing our efforts to preserve and protect trees in the communities we serve.

GIVING BACK TO COMMUNITIES

- Through community involvement, valued partnerships, sponsorships and charitable giving, we're committed to making our communities the best they can be. We sponsor a variety of organizations and events that promote science, technology, engineering and math education, student athletes and renewable energy. Through our Global Days of Service and Matching Gift programs, we support employees' contributions of time and money to charitable organizations or educational institutions of their choice.
